Siemens Gamesa appoints Morten Pilgaard Rasmussen to new global Chief Technology Officer position

- The Global CTO position will help to accelerate harmonization and standardization of technologies across the company
- Pilgaard Rasmussen was previously the Head of Offshore Technology
- He will be a member of the Executive Committee and will be based in Pamplona, Spain

Siemens Gamesa today announced the appointment of Morten Pilgaard Rasmussen to the newly created position of global Chief Technology Officer (CTO), tasked with accelerating harmonization and standardization of technologies across the company under the Mistral strategy program.

Since March 2017, Pilgaard Rasmussen has been the Head of Offshore Technology, in charge of developing new products and technologies for the offshore business. In this position, he worked very closely with the onshore business to find synergies and joint solutions.

In the new role, Pilgaard Rasmussen will be responsible for bringing together the onshore and offshore technology teams to develop a common way of working and joint technology solutions for both types of wind turbines. The appointment will be effective on January 1, 2023.

Pilgaard Rasmussen will be a member of the Executive Committee, reporting directly to Siemens Gamesa CEO, Jochen Eickholt. He will be based in Pamplona, Spain.

“Morten brings a comprehensive overview of both sides of our business: offshore and onshore. Combined with extensive experience in R&D and in leading teams in complex, international environments, that makes him the best candidate to successfully harmonize and standardize our technologies, providing stability to the development process and product quality,” said Siemens Gamesa CEO, Jochen Eickholt.

About Siemens Gamesa Renewable Energy

Siemens Gamesa unlocks the power of wind. For more than 40 years, we have been a pioneer and leader of the wind industry, and today our team of more than 27,000 colleagues work at the center of the global energy revolution to tackle the most significant challenge of our generation – the climate crisis. With a leading position in onshore, offshore, and service, we engineer, build and deliver powerful and reliable wind energy solutions in strong partnership with our customers. A global business with local impact, we have installed more than 124 GW and provide access to clean, affordable and sustainable energy that keeps the lights on across the world.
